The permitted building density is 20%, site coverage 15%, with a maximum of 2 floors and a maximum building height of 10 metres. On the combined area these parameters would support in the region of 1,873 m2 of buildable floor area - sufficient, on an indicative basis, for a development of approximately five to seven detached villas, subject to design and the relevant planning approvals.

Location

Tzionia sits on the approach to Polis Chrysochous, within easy reach of Mauralis Beach and the Akamas coastline. Latchi Marina, with its harbour, tavernas and water sports, is a short drive away, as is the town of Polis Chrysochous with its shops, schools, medical services and weekly market. The area is one of the least developed parts of the Cyprus coastline and is characterised by low-rise villa development, vineyards and open countryside.
